Setup Samsung Watch w/ Android

Introduction

In this guide, we'll explain how to setup the *Solo Wearable app* on a Samsung watch, using an Android Phone.

The models we'll be using are the Samsung Galaxy Watch and Galaxy A10 running Android 9. You may see slight variations depending on the models you have, but the underlying process should remain the same.

Setup Samsung Watch w/ Android

Procedure Overview

This video covers the following steps:

- Downloading the *Samsung Galaxy Watch* app to the Phone
- Pairing the watch to the Phone
- Downloading and installing the *Solo Wearable* app on the Watch

1. Download Samsung Galaxy Watch App

2. Pair Watch to Phone

3. Download / Install Solo Wearable App

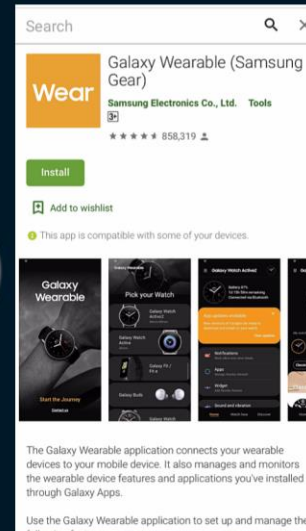

Setup Samsung Watch w/ Android

Download Samsung Galaxy Watch App

If you're using a Samsung phone, the *Galaxy Wear* app should already be installed on your device, and you can **skip** this first step.

Owners of other Android devices will need to **obtain** the app from the Google Play Store by searching for *Samsung Galaxy Watch*.

Download the app by **tapping** *Install*.

Setup Samsung Watch w/ Android

Pair Watch with Phone

Now it's time to pair the watch.

Turn it on and wait for it to indicate it's ready to pair.

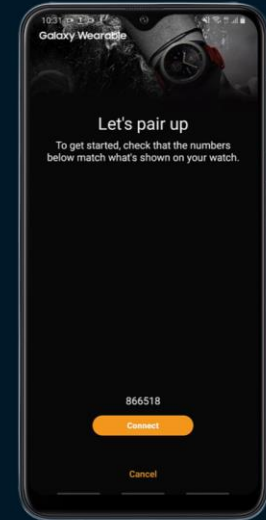

Setup Samsung Watch w/ Android

Pair Watch with Phone cont.

On your Phone, **launch** the *Galaxy Watch* app.

Find your model in the list and **tap** it.

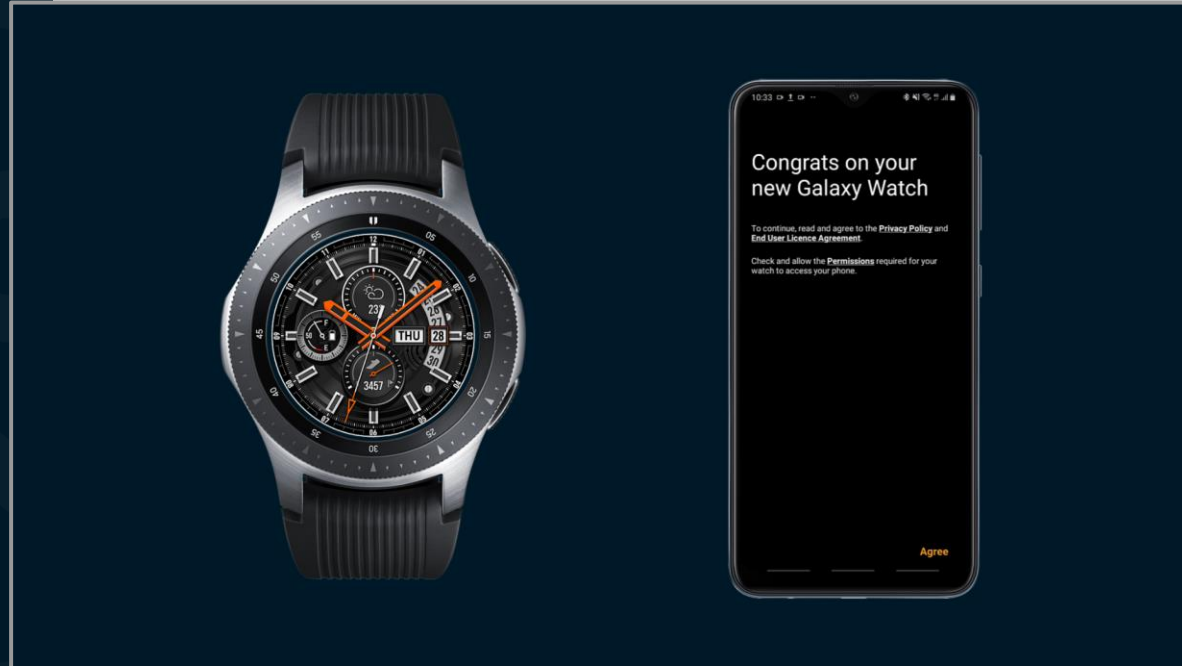

After a short time, the Phone will detect the Watch and ask if you'd like to connect to it. Your watch should also be prompting you to confirm the connection, so go ahead and **confirm** on both.

Pair Watch with Phone cont.

Next, you'll be asked whether you'd like to allow the Watch to send and receive text messages, access your Calendar, and access your phone call logs, noting that none of these things are necessary to support Solo but you may wish to allow them in order to extend the capability of your Watch.

Pair Watch with Phone cont.

Next, you'll be prompted to sign into a Samsung account.

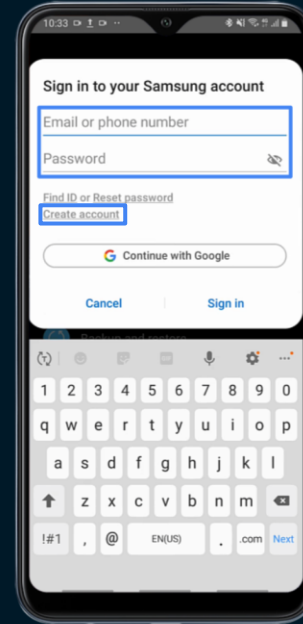

Unless you're using a Samsung phone, you'll need to do this in order to download the Solo app, so **tap** *Sign in*.

Next, the app will check for available backups from any Samsung Watches that you're previously used that you might want to restore from.

If this is your first time doing this, no backups will be found and you can **skip** this step.

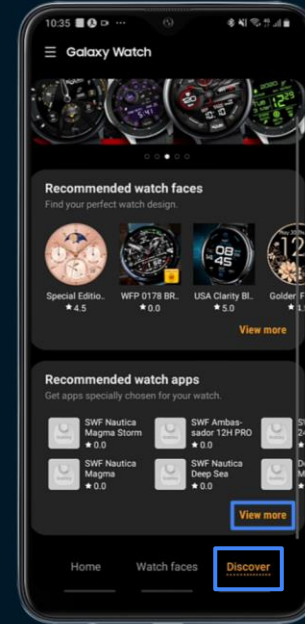

Setup Samsung Watch w/ Android

Download / Install Solo Wearable App

The watch is now fully paired to your Phone, so it's now time to install the *Solo Wearable* app.

In the *Samsung Galaxy Watch* app, **tap** the *Discover* tab, and **tap** *View More* within the *Recommended Watch Apps* section.

Setup Samsung Watch w/ Android

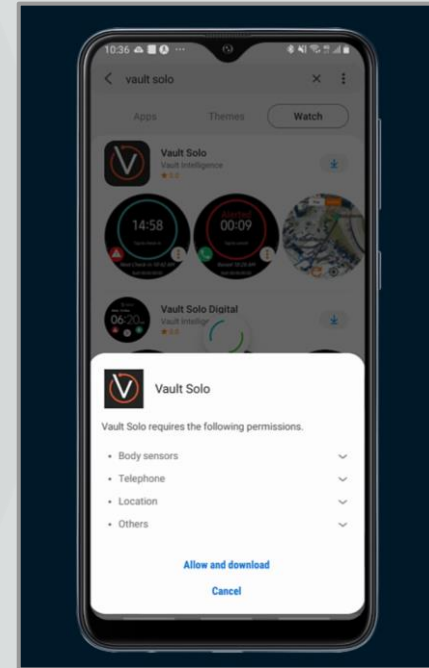

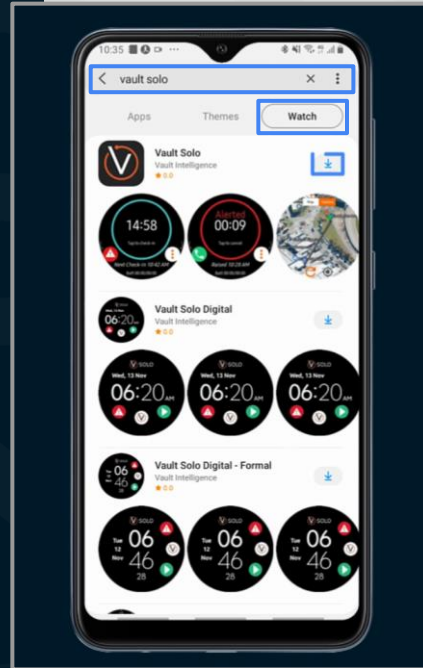

Download / Install Solo Wearable App

The *Galaxy Store* will now open, which is where we will find the Solo app and watchface.

In the *Search* dialogue, **type** *Vault Solo*.

If you have a Samsung Phone, under the *Watch* tab, **tap** to download the *Vault Solo* app.

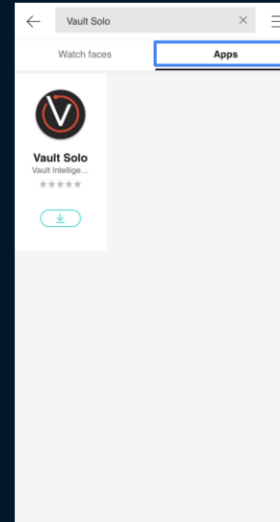

Tap to Allow and download, noting the permissions that will be given to *Solo* to access the resources it needs from your Watch.

Setup Samsung Watch w/ Android

Download / Install Solo Wearable App

Owners of non-Samsung phones will find this under the 'Apps' tab.

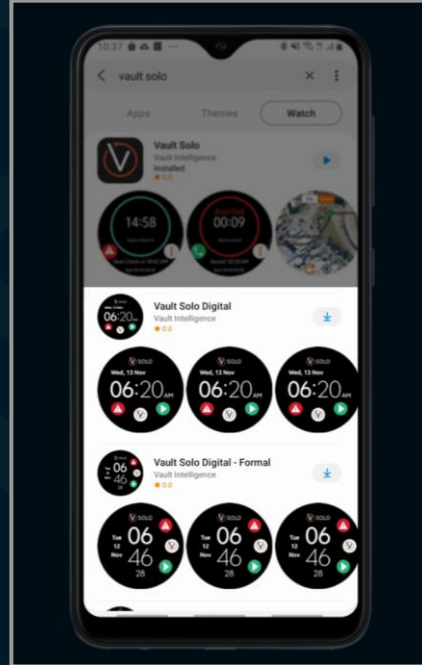

Setup Samsung Watch w/ Android

Download / Install Solo Wearable App

Next, we recommend installing at least one Solo watch face. These can replace the pre-installed watch faces, and provide quick access to some of Solo's key features including the ability to raise an alert right from the watch face.

Owners of non-Samsung phones will find these under the 'watch faces' tab.

Once installed, **long press** on the existing watch face and swipe until the *Solo* one is found, then **tap** to select it.

Setup Samsung Watch w/ Android

Next Steps

Now that the *Solo* app and watch face are installed, it's time to register the app to your Solo account.

You'll find help with this and other Solo Wearable procedures in the Support Portal.
