

Damstra Technology – Installation Guide – Visitor Terminal Camera Replacement Guide

What you'll need

You will need the following components and tools to complete this install:

1. Camera and bracket
2. Phillips Head Screwdriver
3. Snips
4. Zip ties

How to install

Follow the instructions below to complete the install:

1. Please unplug the USB camera from and cut the zip ties holding the cables
2. Unscrew the screw holding the bracket and slide the camera and bracket out

3. Slide the replacement camera and bracket into the slot and screw it back in
4. Connect the USB cable back in to the available USB port
5. Please zip tie the cable to be bracket, leaving some slack

6. Tuck the remaining cable inside the stand

What to do with the replaced components?

Please arrange to ship the replaced components to:

Damstra Technology c/o Phoenix EMS
2/8 Nelson Rd,
Cardiff NSW 2285
Ph: 1300 074 636

You can use the same box and packing materials that the replacement components were sent to you using.
