

Workforce Management – Worksite Documents

Manage your Company

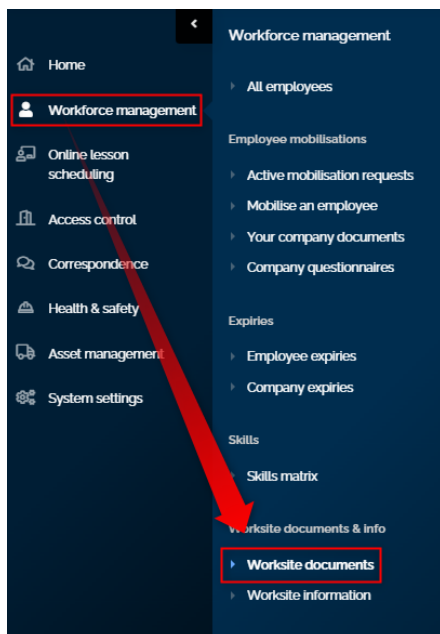

Author: J-Pee De Guzman

Product: EPP WFM

When contractors are engaged to work on a project at a worksite, it's crucial to provide them with the necessary documents to ensure they understand the site's requirements, safety protocols and project expectations.

Worksite Documents featured in EPP Manage your Company are the documents supplied by the different worksite for contractors to use.

To access this, from the left side menu, click **Workforce management** → **Worksite documents**.

1. Select the Worksite from the choices on the left side to see which document or forms you want.
2. Click the name of the document/form to download.
